

Access platform and rail

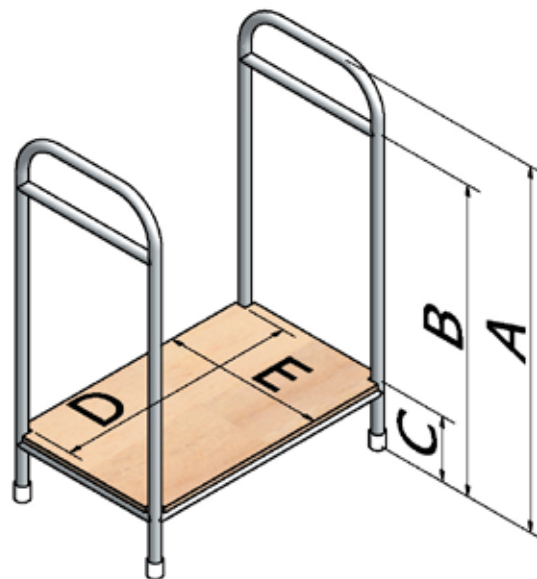

For assisting children with poor balance or short stature to transfer safely onto and off the toilet, and providing support while sitting on the toilet. Can also be used to enable a child to access other facilities such as washbasins, baths and beds.

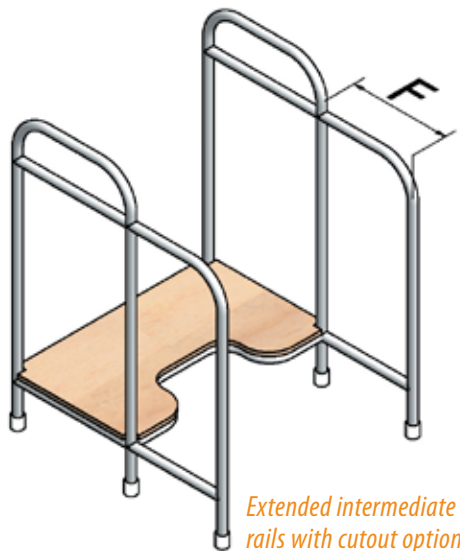

Features

- upper and intermediate rail heights provide adequate reach
- white powdercoated or stainless steel frame
- non-slip strips across platform surface
- rubber-tipped feet

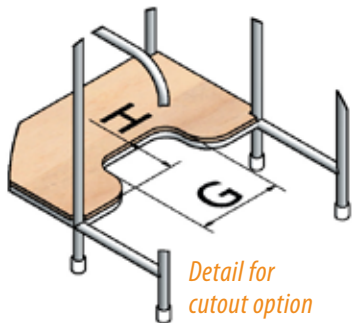

Options

- extension rails at intermediate rail height for side support while on the toilet
- a cutout in the platform to fit around the front of the toilet pan
- an additional step, which can retract under the platform
- the extension rails can be hinged to fold back for washbasin access or similar, and to minimise storage space

Extended intermediate rails with cutout option

Detail for cutout option

Access platform and rail dimensions (mm)

		Small <input type="checkbox"/>	Large <input type="checkbox"/>	Custom
A	Top rail height from ground	680	780	
B	Intermediate rail height from ground	580	680	
C	Platform height from ground	120	140
